- Web Technologies- HTML, CSS, JavaScript
- Acquainted with frontend Library: React
- Version control: Git

Projects: Weather-App

The app offers a user-friendly interface, allowing users to access weather details for their current location or any desired location worldwide.

Key Features:

- Utilized modern programming languages i.e. HTML, CSS and Javascript to build weather application.
- Integrated with reliable weather APIs to fetch accurate and up-to-date weather data.
- Implemented geolocation services to automatically detect and display weather information based on the user's current location.
- Developed a sleek and intuitive user interface, enabling users to easily navigate through the app and access the desired weather details.
- Incorporated advanced features such as Humidity, wind speed, and temperature trends.
- Optimized the application for performance and responsiveness, ensuring a smooth and seamless user experience.
- Received positive user feedback and high ratings on app stores, indicating user satisfaction with the app's accuracy, reliability, and user experience.

Projects: Zomato-After Delivery Process

Implemented and managed the following aspects of the Zomato after delivery process:

Key Features:

- Waiting for restaurant to accept an Order
- Allowing customers to monitor the progress of their orders. This feature provided transparency and empowered customers to stay informed about the status of their deliveries.
- Delivery Valet Assignment: To assign delivery valets to pick up orders from restaurants and ensure smooth and timely deliveries.
- Delivery Updates a notification to keep customers informed about the progress of their deliveries. Customers received timely updates regarding the delivery executive's location.
- Feedback and Ratings: Asking for feedbacks to customers after the delivery of an order.

Projects: Password Generator

This application is designed to generate strong, random passwords for users, helping them enhance their online security and protect their sensitive information.

Key Features:

- Designed and developed a secure password generator that creates strong and random passwords.
- The generator uses a combination of uppercase and lowercase letters, numbers, and special characters.
- It allows users to customize password length and complexity, ensuring their online accounts are protected.

Experience: Non-Technical Content Developer Consultant at Funfirst Global Skillers, Mumbai, Maharashtra, 2016-2020.
